now in progress there will be carried on with more vigor than ever."

IN FROM THE LUCKY BOY.

Supt. Henry McCornick Here to Confer With the Owners.

Henry McCornick, the superintendent with the owners of the property, and unnor has it that another deal is ponding, which is likely to be closed up almost any day. Colonel Treweck was approached on the subject a day or two go and pleaded that he had nothing or publication yet. When men yeserday, Mr. McCornick and Colonel Treweck were together, and after a few purching had been fired at the former egrating the mine, the colonel advised to the transfer of the colonel advised to the transfer of the colonel advised to the transfer of the colonel advised to the colonel and the colonel advised to the colonel

The first shipment from the Wedge mine, in the Ohio mining district, near Marysvale, has been sampled, and last evening Harry L. Mills, one of the principal owners, made the result known.

The shipment brought up by Mr. Mills consisted of forty-six sarks of what he says is the mine's second-class ore. The values obtained are quite high, however the bot averaged up 20.1 owness gold and '12.5 owners affect of the shipment sampled only weighted about 5.00e ounds, so the Wedge company realizes from it about \$1,000.

The result is exceedingly gratifying and bears out every statement made bourt the productiveness of the Wedge alie.

It has been chained that the Wedge line.

It has been chained that the Wedge as a large quantity of ore in sight at mine sowers have a thougand dollars. Some ore serious or have a thougand dollars. Some ore reheast ore has been sacked and will sent on hater.

It is learned from Mr. Mills that the first more view have the saturates that the prices have tended they are in possession of a mine sounderful ment, and as a gentleman restred in properties mear to it said emanagement to feel a little squaraming and hart assages taken have men drivered that the word of the saturation of the came from. The entire words in the given assurances that the mining industry and have been reaccountered in the new and distinct of the saturation of the came from the proposed them so it further ungestion and have a proven the mining and mills and my been the plant with the water may be a supply might be described with a view to putting in a plant there is mining industry and Marysvale in general, and work in the properties of the water may be a supply might be a properties that the water and the feet that the water and the properties that the water and the feet t

is a nutshell why the Cintario bas not, before now, harnessed the water flowing through the big tunnel for the purpose of supplying power to run the mills and nimes. The plant now in operation develops only some 25s horse power, and several times that amount will be uncerssary to replace the steam power, if all fires are to be drawn. With the extension of the drain tunnel and the large amount of work now being done in new ground, the flow of water through the tunnel will increase rather than diminish, so it is safe to assume that the flume from its mouth will be extended, as stated by Mr. Chambers, and that a large generating plant will be exceeded and steam displaced as far as possible.

It's Utah Representative Tells Just

The Goggenheim Exploration com-pany, with a capitalization of \$6,000,000 McCornick had bottled up his va-inry and sauntered off with the fel.

That readd be learned from him welling mines, operating smetters, rali-

all that could be learned from him was that the mine was looking fine, a station had been cut on the 800 and the mill was running steadily and doing good work.

RED WING MILL CHANGES.

Crushing Capacity to Be Increased to Two Hundred Tons Dally.

Preparations are to begin at some for the scalargement of the crushing capacity of the Red Wing mill at Bingham. The present facilities are entirely hadequate to meet the demands hepset the change is to be mide. The mill is now crushing about fifty toms a day and it is the intention to put in rolls sufficient to handle 200 tens of ore Gally.

Professor W. H. Tibbals, who was are the mine, accompanied by Prosident J. 2. Corum, vesterday, said loss ment is had not been decided to make any changes in the contracting facilities into yet; the plant can eately dispose of 100 tons of ore contracting facilities into yet; the plant can eately dispose of 100 tons of or every twenty-four hours, so for awhile at least to attempt will be made to put in additional concentrating tables.

Last, for the purpose of buying and allowed the mine was looking files, or the state of this city was present and had a hand in its forms and succeeded in having \$500.000 to the begin and succeeded in having \$500.000 to the begin at an enter for the stock.

The mill is now crushing about fifty to the stock in the stock.

The mill is now crushing about fifty to make any child the stock in the stock in the stock of the congress of the company and Gen R. Both-world the control of the stock.

The mill is now crushing about fifty to make any control of the stock in the stock of the congress of the company of the Red Wing mill at Engage to the congress of the congress o

AS TO CEDAR VALLEY,

Expert Adamson, It Is Said, Will Report Favorably.

Considerable interest was manifested in mining circles yesterday over the recent strike in the Cedar Valley mine in the Peepstone district. William Adamson, the well known mining experts was the property and it is said he is about to make a favorable report. A large bedy of ore has been exposed, but from an interested party it is learned the values so far are irregular and it has not been determined how much of the voin exposed can be depended upon. The outlook is very encouraging, however, and prospects of the Cedar Valley becoming a valuable cyaniding proposition are good.

As to the Huntsman.

The Attack of a New York Paper Commented On.

An article written by the Sait Lake correspondent of the Engineering and Mining Journal, and published in the Huntsman Copper Mining company, operating in the La Sai mining regions, was branded as a fake created considerable comment in mining circles yesterday.

The Huntsman group of claims was bonded last spring by representatives of Ferter McCourt of Denver and his New York associates from Professor W. H. Tibbals and Eugene Peyton, of Miners' Basin, Utah, for \$40,808, Un-

exploiting of the Silver Shield mine, located not far from the International, has returned from a trip to the property and comes home greatly pleased with the prevailing conditions there. A force of men is employed at the old workings taking out shipping one of the condition of A three-foot vein of galema and lead carbonates is exposed thore. The new tunnel being driven at a lower depth towards the vein has been completed for a distance of seventy-five feet. It is the intention, when the ore is intercepted, to handle the output of the mine from the new tunnel.

TO WORK WILSON HILL.

G. M. Hein Says a Smelter Will Be Put Up at Once.

J. S. Garrison and W. F. Garrison expect to leave in a few days for Deep Cresk to start up work on the Wilson Hill group, which was purchased by G. M. Hein of this city, and who has since incorporated the Colissum Mining & Smelting company.

Mr. Hein is preparing plans for the crecition of a twenty-ton smelting plant at once.

J. S. Garrison speaks enthusiastically of the Wilson Hill group and believes with the installation of a smelter it will make a big paying proposition.

THE KIDNETS ARE MOST IMPORTANT ORGANS. FOR THEY ARE THE FILTERS Of our systems. When they fall to perform the work intended for them the blood becomes overcharged with the waste matters of the body and the poisons that breed disease, and the result is sickness and suffering. The health of the kidneys themselves depends upon their proper working.

Hudyan Reconstructs Broken-Down Organic Tissues.

And this property makes it a most valuable remedy for the cure of kidney diseases. If your kidneys are weak, if you notice a sediment, if you experience any of the above symptoms, it is time to guard against serious disease. A few doses of Hudyan will now suffice to avert the danger that is threatening. It is best siways to

begin treatment early just as soon as the first symptom is observed.

Heart disease is a complication that is often brought on by the imperfect working of the kidneys, resulting in poor circulation and dropsy. Hidyan awerts this dangerous complication. Hid/san has prolonged the lives of hundreds of men and women who were sufferers from organic hidney disease in its worst forms. Hudyan cures are permanent and lasting.

If any one goes on suffering the pangs of kidney disease he will have himself or herself to blame. Hudyan is within the reach of all. It is a positive cure.

More Evidence of Hudyan's Wonderful

Myrile Point, Ore.

DEAR DOCTORS—I can areas you that Hudyan is indeed wenderful. My case was one of serious kidney disease. I use nothing that skin and home. Decises said I would not get well. They did me no good but Hudyan did. Hudyau soon gave us strength and in less than five weeks time I was a sund and well made again.
